## Introducing Help Mail Scanner

MailScanner from Help Internet is an off site service that uses dedicated Help Internet Servers to monitor and cleanse malicious mail to protect your organisation from major disasters. We constantly monitor and update for the latest known virus' - create and update grey and black lists of unknown senders to ensure disguised/dangerous mail does not reach your inbox. 35% of all mail sent is SPAM, it wastes time, can be dangerous and is annoying, sign up today to ensure this is a minimum effect on your business.

### Features and Benefits:

- Filters out annoying and potentially dangerous junk emails (SPAM).
- Automatically blocks phishing e-mails from entering your inbox, protecting you from this dangerous form of identity theft.
- Continually and automatically searches for, finds, and removes viruses and other malicious software in a single, powerful operation.

**You can Relax in the knowledge that you're in safe hands, helping your business grow naturally**
